

## Why Our Dentists?

We know how you feel; every time you see your dentist, he probably doesn't spend more than five minutes, if that, examining your teeth.

Before you know it, you're paying the bill and heading for the door. It's no surprise this kind of treatment makes you feel insignificant and like your dentist doesn't care enough to actually take the time to listen, but you don't have to feel that way anymore. Our group of dentists in Alpharetta, GA, believe in elevating the patient experience to a whole new level.

Find out how we can improve your next dental visit.

Get the smile you always dreamed of.

**Petula Hom-Minniti, D.D.S.**

Dr. Hom opened her private office in Alpharetta in September 2005. With the experience she has acquired as both a general dentist and a pediatric dentist, Dr. Hom is dedicated to providing your child with the best dental experience in the most caring manner possible!!! Dr. Hom opened her second office location in Downtown Cumming in October 2015.

**Lorenzo Minniti, D.D.S.**

Dr Minniti is a big proponent in continuing education. This prestigious honor is achieved by completing 1,100 hours of continuing education in the 16 disciplines of general dentistry, including over 400 hours of hands on clinical skills training. The Academy of General Dentistry is a national association of general dentists, and Mastership is the highest honor that can be attained in this organization. Less than 3,000 dentists nationwide hold MAGD status.

**David Ward PhD, DDS.**

Dr. Ward enjoys providing a wide variety of care including general dentistry, IV sedation, implants, special needs, and hospital care. In addition, Dr. Ward loves working with people, building relationships with patients, and working in a team environment. Dr. Ward is a member of AGD, AAID, and is a writer for the Christian Medical and Dental Association.

## Ask Us About

Invisalign is a popular straightening method for teenagers and adults. They are clear in color, removable, and work as effectively as traditional metal braces. They also work faster and require fewer appointments. This removable option is conducive to whatever lifestyle you want to lead—take them off for a couple hours a day without worries. Invisalign also allows patients to eat all the classic “off-limits” braces foods. Buttery popcorn? Crunch away. Gummy candies? Absolutely. Leave your hesitations behind with this low-maintenance option.
